

Sulphur World Symposium 2011
April 11-14, 2011
New York City, USA

www.sulphurinstitute.org

Call for Papers

Overview: The Sulphur Institute (TSI) is sponsoring its *Sulphur World Symposium 2011* in New York City, USA. This three-day symposium is similar in format to the 2010 event held in Doha, Qatar. The symposium will provide speakers with opportunities to expose their expertise and network with the world's sulphur community, gain insight from some of the best minds in the sulphur and sulphuric acid businesses about current events and developing trends and issues in various parts of the world. Assessments of emerging sulphur markets and uses, current transport regulations, logistics, sustainability and environment, health and safety developments impacting the industry will also be discussed. Join us as a speaker at this prestigious and well-covered global event.

Submission Requirements: Papers must be original material and not published previously. Authors must submit an abstract (not more than one page) electronically to symposia@sulphurinstitute.org, no later than Friday, November 26, 2010. Abstracts submitted will be evaluated for relevance to sulphur and related industries, originality and timeliness. Authors will be notified of acceptance no later than Friday, December 17, 2010. Final electronic manuscripts of accepted papers must be received by TSI no later than Friday, February 25, 2011, to be included in the symposium proceedings. Authors must agree that published proceedings are TSI property which will be provided to symposium participants and made available for purchase following the symposium. One author for each accepted paper will be granted a complimentary registration. Please use Microsoft Word format for your paper.

Topics of Interest Include:

World Economic Outlook
Global Energy Outlook

Agricultural Market Prospects

- Crop Production Outlook and Fertilizer Demand Globally, in Major Regions, or in important countries (China, India, Brazil)
- African Development and Outlook for the Fertilizer Industry
- Biofuels Outlook: Assessment of Long-Term Impacts on Agriculture and Sulphur

Phosphate Outlook

- Fertilizers
- Feed/Industrial Phosphates

Sulphur/sulphuric acid Outlook

- Asia: East, South and West
- FSU, Caspian Sea
- North America
- Global

Alternative Energy Outlook and Impact on Sulphur

- Carbon Capture and Sequestration (CCS), Regional outcomes and impacts on sulphur

Sour Gas Reinjection

Metallurgical Processing and Sulphur Production/Use

- Nickel, Copper, Zinc, Uranium Ore Leach
- Smelter acid

Sulphur fertilizers: Status and Prospects Worldwide, or by Major Regions

- Other Sulphur Uses: Caprolactam, Hydrofluoric Acid, Pigments, Construction Materials, Batteries, Novel Applications

Sulphur in Marine, Aviation, Land Fuels: Impacts on Industry

- Environment, Health and Safety Regulations/Programs Impacting Sulphur

Climate Change and the Sulphur Industry

Sustainability

New applications

Important Dates:

Abstract Deadline: November 26, 2010

Notification of Acceptance: December 17, 2010

Accepted Papers and Presentations Due: February 25, 2011

Symposium Contacts:

Email address for all correspondence: symposia@sulphurinstitute.org

Speakers: Attention, Chris de Brey, CdeBrey@sulphurinstitute.org

Administration: Attention, Marcia Horn, MHorn@sulphurinstitute.org
