

# Sulphur is Essential for Plant Health

## BROCCOLI

Lighter-than-normal green color covers the entire leaf, beginning with the younger leaves.

## POTATO

Younger leaves become yellow while the lower leaves remain a healthy green color.

## PEANUT

The developing leaves turn yellow, especially along the veins and petioles. The yellowing later spreads across the leaf and to older leaves.

## PAPAYA

The leaves and petioles of the top shoot become yellow. The yellowing later progresses to mature leaves.

## ROMAINE LETTUCE

The youngest leaves become yellow first, followed by yellow symptoms on older leaves.

## BUTTERHEAD LETTUCE

Uniform yellowing first appears on the young leaves and progresses to the mature leaves.
