Shrieve Chemical Company Joins The Sulphur Institute

WASHINGTON, DC, November 27, 2012 – The Sulphur Institute (TSI) welcomes Shrieve Chemical Company to its growing list of members. Shrieve Chemical Company is one of the leading suppliers of sulphur and sulphuric acid within North America as well as a major supplier and shipper of inorganic and organic chemicals via truck, rail and barge across the United States, Canada and Mexico. Founded in 1978 in The Woodlands, Texas, to supply sulphur based commodities, Shrieve Chemical Company later expanded into sulphuric acid and nitrogen based products.

Jack Weaverling, senior vice president of Shrieve Chemical Company, cited TSI's "experience and expertise in sulphur transportation and logistics" as a key benefit of membership. Catherine Randazzo, president and CEO of TSI, welcomed Shrieve and stated "TSI's membership is growing, in large part, due to its dedication to advocating for responsible and beneficial resolution of issues that are associated with regulations governing sulphur transportation and logistics on multiple levels."

Founded in 1960, TSI represents all stakeholders actively engaged in producing, buying, selling, handling, transporting, or adding value to sulphur on a global basis. For more information about TSI membership, programs and contributions to the industry as well as, Sulphur—an advantaged element[®], TSI's most recent educational program, contact Don Messick, The Sulphur Institute, 1020 19th Street NW, Suite 520, Washington, DC 20036, USA.
