Suncor Energy Joins TSI

WASHINGTON, DC, July 27, 2012 – The Sulphur Institute (TSI) recently welcomed Suncor Energy of Calgary, Alberta, Canada, as a new member to the organization. Catherine Randazzo, TSI president and CEO, remarked, “Suncor recognizes its position as a major player in the sulphur industry and is eager to become part of TSI — dedicated to representing the entire value chain for this widely-used commodity. Suncor serves the North American market with sulphur from its oil sands upgraders, refineries and gas plants, along with its lubricant business, with additional material sold offshore. Their dedicated logistics chain fits well with TSI’s various programs. We welcome Suncor to TSI.”

Suncor’s Manager for By-Products Marketing and Business Development Derek Allen remarked, “Our oil sands operations are the focus of our business and with that comes a significant amount of sulphur. TSI touches various aspects of our business with its transportation regulations and logistics programs and we expect to benefit from their expertise regarding the safe and efficient handling of this important commodity.”

Founded in 1960, TSI represents all stakeholders actively engaged in producing, buying, selling, handling, transporting, or adding value to sulphur on a global basis. For more information about TSI membership, programs and contributions to the industry as well as, *Sulphur—an advantaged element*[®], TSI’s most recent educational program, contact Don Messick, The Sulphur Institute, 1020 19th Street NW, Suite 520, Washington, DC 20036, USA.
